FORGE

Everything in one. Tool longlist + decisions needed. 116 tools across 14 sections.

How to use this: tick the tools you want, or reply with codes like *"P1–P14, P19, P27, I1–I5, D1, V6, U1"*. Mark any as **v1** (ship first) vs **later**. Then answer Q1–Q9 on the last page. Short answers are fine.

P — PDF: Organise

☐	P1	**Merge**	Combine multiple PDFs into one, drag to set order.
☐	P2	**Split**	By page range, every N pages, by bookmarks, or by target file size.
☐	P3	**Page manager**	Thumbnail grid: reorder, delete, duplicate pages by drag & drop.
☐	P4	**Rotate**	Rotate single pages or the whole document.
☐	P5	**Extract pages**	Pull selected pages out into a new PDF.
☐	P6	**Insert pages**	Add blank pages or pages from another PDF anywhere.
☐	P7	**Crop / trim**	Crop margins manually or auto-detect whitespace.
☐	P8	**N-up / booklet**	2 or 4 pages per sheet, booklet imposition for printing.

P — PDF: Optimise

☐	P9	**Compress**	Presets (screen / ebook / print) plus custom DPI and image quality.
☐	P10	**Grayscale**	Convert colour PDF to black & white to save ink and size.
☐	P11	**Flatten**	Bake forms, annotations and layers into the page.
☐	P12	**Repair**	Attempt to fix corrupted or broken PDFs.
☐	P13	**Sanitise**	Strip metadata, embedded files, JavaScript, hidden content.
☐	P14	**Linearise**	Optimise for fast web view (page 1 loads first).

P — PDF: Edit

☐	P15	**Edit existing text**	True inline text editing. The hardest tool on the list.
☐	P16	**Add content**	Text boxes, shapes, images, lines, arrows.
☐	P17	**Annotate**	Highlight, underline, strikeout, sticky notes, freehand pen.
☐	P18	**Whiteout & replace**	Cover content and type over it.
☐	P19	**True redaction**	Actually deletes content underneath; search-to-redact emails, phones, etc.
☐	P20	**Watermark**	Text or image, opacity, angle, tiling.
☐	P21	**Page numbers / headers**	Page numbers, headers, footers, Bates numbering.
☐	P22	**Bookmarks**	Create and edit the outline / table of contents.
☐	P23	**Metadata**	Edit title, author, subject, keywords.
☐	P24	**Hyperlinks**	Add, edit and remove links.

P — PDF: Forms & Signing

☐	P25	**Fill forms**	Fill existing form fields.
☐	P26	**Create forms**	Add text fields, checkboxes, dropdowns, signature boxes.

☐	P27	**Sign**	Draw, type or upload a signature; saved signature library.
☐	P28	**Digital signatures**	Certificate-based signing and signature verification.

P — PDF: Security

☐	P29	**Protect**	Password + permissions (no print, no copy, etc.).
☐	P30	**Unlock**	Remove password when you know it.

P — PDF: Convert

☐	P31	**PDF → images**	PNG / JPG / WebP per page at chosen DPI.
☐	P32	**Images → PDF**	Photos/scans into a PDF, page size and margins.
☐	P33	**PDF → text / Markdown**	Extract readable text.
☐	P34	**PDF → Office**	Word / Excel / PowerPoint. Heavy, quality varies.
☐	P35	**Office / HTML → PDF**	Usually needs a server or LibreOffice engine.
☐	P36	**PDF/A**	Archival-standard conversion.
☐	P37	**OCR**	Make scanned PDFs searchable and selectable.
☐	P38	**Extract assets**	Pull out embedded images and fonts.

P — PDF: Analyse & Power

☐	P39	**Compare**	Visual and text diff between two PDFs.
☐	P40	**Viewer**	Fast viewer with search.
☐	P41	**Batch mode**	Run any tool on many files at once.
☐	P42	**Workflows**	Chain steps: merge → compress → watermark → protect, saved as recipes.
☐	P43	**Scan to PDF**	Phone camera scan with edge detect, deskew, enhance.

I — Image

☐	I1	**Resize / crop**	Pixel, percent or preset sizes (social, passport, etc.).
☐	I2	**Compress**	Shrink file size with quality slider and preview.
☐	I3	**Convert**	HEIC, WebP, AVIF, PNG, JPG, SVG, ICO.
☐	I4	**Background remover**	On-device AI cut-out.
☐	I5	**Strip EXIF**	Remove location and camera data.
☐	I6	**Colour picker / palette**	Pick colours, extract palette from image.
☐	I7	**Upscale**	AI enlarge without blur.
☐	I8	**Icon generator**	Favicon and app icon sets from one image.
☐	I9	**Collage**	Grid layouts from multiple images.
☐	I10	**Text overlay / meme**	Add captions and text to images.
☐	I11	**Image ↔ Base64**	Encode/decode images as data URIs.
☐	I12	**Annotate / blur**	Arrows, boxes, blur or pixelate sensitive areas.

V — Video & Audio

☐	V1	**Trim / cut**	Cut start/end or remove sections.
☐	V2	**Compress**	Shrink video to a target size.

☐	V3	**Convert**	MP4, WebM, MOV, MP3, WAV, etc.
☐	V4	**Video → GIF**	Clip to GIF with fps and size control.
☐	V5	**Extract audio**	Rip the audio track from video.
☐	V6	**Audio leveller**	Loudness normalise to LUFS target.
☐	V7	**Noise reduction**	Clean background hiss and hum.
☐	V8	**Speed**	Speed up / slow down.
☐	V9	**Mute**	Strip audio from video.
☐	V10	**Screen recorder**	Record screen (and mic) in browser.
☐	V11	**Voice recorder**	Simple recorder with export.
☐	V12	**Transcription**	Speech to text, subtitles (SRT).

D — Device / Sensor (best on phone)

☐	D1	**Spirit level**	Bubble level using the phone's tilt sensor.
☐	D2	**Ruler**	On-screen ruler, calibrated.
☐	D3	**Protractor / angle**	Measure angles with camera or tilt.
☐	D4	**Compass**	Heading with calibration.
☐	D5	**Sound meter**	dB level from the mic.
☐	D6	**Flashlight**	Torch toggle plus strobe/SOS.
☐	D7	**Magnifier**	Camera zoom with freeze frame.
☐	D8	**QR / barcode scanner**	Scan and act on codes.
☐	D9	**Light meter**	Lux estimate from camera.
☐	D10	**Vibration meter**	Seismograph from accelerometer.

U — Everyday Utilities

☐	U1	**Unit converter**	Length, weight, temp, volume, data, etc.
☐	U2	**Currency converter**	Live rates (needs an API).
☐	U3	**Calculator**	Scientific with history.
☐	U4	**Percent / tip / split**	Quick money maths.
☐	U5	**Date calculator**	Difference between dates, age, add/subtract days.
☐	U6	**Timezone converter**	World clock and meeting planner.
☐	U7	**Timers**	Stopwatch, countdown, Pomodoro.
☐	U8	**Randomiser**	Number, coin, dice, list picker.
☐	U9	**Counter / tally**	Tap counter with multiple tallies.
☐	U10	**Loan / EMI**	Repayments, interest, amortisation table.
☐	U11	**BMI / health calcs**	BMI, BMR, calories.
☐	U12	**QR generator**	URL, Wi-Fi, contact, text QR codes.

T — Text

☐	T1	**Word counter**	Words, characters, reading time.
☐	T2	**Case converter**	UPPER, lower, Title, camelCase, snake_case.

☐	T3	**Find & replace**	With regex support.
☐	T4	**Diff checker**	Compare two texts side by side.
☐	T5	**Lorem ipsum**	Placeholder text generator.
☐	T6	**Line tools**	Dedupe, sort, trim, number lines.
☐	T7	**Markdown editor**	Live preview, export to PDF/HTML.
☐	T8	**Text to speech**	Read text aloud, export audio.

X — Developer

☐	X1	**Formatter / validator**	JSON, YAML, XML pretty-print and validate.
☐	X2	**Encode / decode**	Base64, URL, HTML entities.
☐	X3	**Hash generator**	MD5, SHA-1, SHA-256, etc.
☐	X4	**UUID generator**	v4 / v7, bulk.
☐	X5	**JWT decoder**	Inspect token header and payload.
☐	X6	**Regex tester**	Live match highlighting.
☐	X7	**Cron explainer**	Cron expression to plain English.
☐	X8	**Timestamp converter**	Unix ↔ human dates.
☐	X9	**Colour converter**	HEX, RGB, HSL, contrast checker.
☐	X10	**CSV ↔ JSON**	Convert and preview tables.
☐	X11	**Password generator**	Strength options, passphrases.

F — Files

☐	F1	**Zip / unzip**	Create and extract archives.
☐	F2	**Hash checker**	Verify file checksums.
☐	F3	**Bulk rename**	Pattern-based renaming.
☐	F4	**File identifier**	What is this file really?

A — AI (new — needs an API, costs per use)

☐	A1	**Chat with PDF**	Ask questions about a document.
☐	A2	**Summarise**	Summarise PDFs, articles, transcripts.
☐	A3	**Translate document**	Translate a PDF keeping layout.
☐	A4	**Smart extract**	Pull tables / invoice fields into Excel.

DECISIONS

What I need from you before builds start.

Q1 — Platform
Web app (installable on phone + desktop) / Native desktop / Native mobile / All. My rec: installable web app first.

Q2 — Processing
Fully on-device (private, offline, free to run) / Hybrid: on-device by default, server for heavy jobs (P15, P34, P35, OCR, AI). My rec: hybrid.

Q3 — "Leveller"
Spirit level (D1) / Audio leveller (V6) / Both.

Q4 — Audience
Just me / Public free / Public with paid tier. Decides accounts and payments.

Q5 — Visual style
A. Industrial Forge (dark charcoal, ember orange) · B. Clean Swiss (white, one accent) · C. Brutalist / terminal (mono, hard edges) · D. Soft glass (rounded, blur, pastel) · or a mix.

Q6 — Light / dark
Dark only / Light only / Both with toggle.

Q7 — Home screen
Search-first (type what you want, like Spotlight) / Category grid / Both.

Q8 — Version 1 scope
Which codes ship first? Pick ~15–25 for v1; the rest go to the roadmap.

Q9 — Anything missing?
Tools you use that aren't on this list.

After you reply: I write the tool contract + design system, then hand small, tightly-scoped build tasks to Sonnet/Haiku agents, review and merge.
